Vented Gas Logs

Receive a **\$200 discount** towards the purchase/installation of a new gas log set when you replace wood burning in your existing fireplace through the Healthy Hearths Gas Log Incentive Program. This program applies to most South Coast Air Basin residents in Southern California. Installation must be performed by the retailer. Choose any of the products listed in this brochure to be eligible for your instant rebate!

Park Series logs demonstrate heating efficiencies comparable to heater rated direct vent fireplaces. With heating efficiencies of 56% in conventional masonry wood burning fireplaces, they contribute 50% more to the total system heat output than typical concrete gas logs. Our ceramic burner eliminates sooting that can be experienced with vented logs. Choose from the **Blue Ridge, Acadia or Sequoia models**. All Park Series models include a remote control.

24"	HCM-24-RFP	Sequoia	Variable Remote Control	43 - 65,000	Propane

Park Series Logs Include: Gas Shut-Off Valve with 18" Flex Connector, Honeywell Remote with Adjustable Flame & Timer, Lava Rock, Ember Flakes, Glowing Embers, 5 Piece Log Scrap Kit, and Damper Clamp.

Avalon gas logs are intricately detailed because they are recreated from an actual wood fire. The log set includes a decorative five log scrap kit, ember chips and lava floor cinders to complete the presentation. The cascading ramp style ember bed burner brings life to the warm yellow flames. The Avalon is operated with an electronic ignition. Features include a multi-function remote control and flex gas connector with shut-off valve.

Avalon

Avalon Vented Gas Log Sets

SIZE	MODEL #	MODEL	CONTROL	BTU OUTPUT	FUEL
18"	VTD-18ND-TKA	Avalon	Electronic Ignition	38 - 58,000	Natural
18"	VTD-18PD-TKA	Avalon	Electronic Ignition	46 - 58,000	Propane
24"	VTD-24ND-TKA	Avalon	Electronic Ignition	45 - 68,000	Natural
24"	VTD-24PD-TKA	Avalon	Electronic Ignition	54 - 68,000	Propane

Avalon Gas Logs Include: Gas Shut-Off Valve with 18" Flex Connector, Multi-Function Remote Control, Ember Chips, Lava Floor Cinders, and Decorative Five Log Scrap Kit.

The Giant Timbers feature two burners of bright yellow flames! The burner is cantilevered to produce tall flames that will not be dwarfed by its massive 19" high logs, the tallest in the industry! The stainless steel chassis and grate allow for outdoor applications. Turn up the heat outside with a lava rock flame bed.

Designed to fit the larger fireboxes of today! 24" log sets are designed for 36" fireboxes, 30" log sets for 42" fireboxes and 36" log sets for 48" fireboxes and larger masonry units.

36" Giant Timbers with Lava Rock Flame Bed in 50" Masonry Firebox

*Electronic Ignition models include a variable remote control.

Accessories

MRC	On/Off Remote Control Kit.
MFEB	Lava Rock Flame Bed for Outdoor Applications
LAMF	8 Piece Accessory Log Kit

The Cascade gas logs are among the most dramatic in our offering. The ceramic ramp ember bed burner has a standing pilot and instantly creates a true to life wood fire presentation that would take a wood fire hours to accomplish. The low profile design and decorative six piece log scrap kit add to the realistic presentation. The log set is complete with glowing ember chips and lava floor cinders, a gas shut off valve and stainless flex gas connector. Choose from three available sizes.

*Installation in certain FMI produced fireplaces with smaller dimensions has been approved

1. Installation Considerations Vented Gas Logs install in any properly certified and vented masonry fireplace or manufactured firebox. All burner systems with variable manual controls including remote ready are also listed to the ANSI Z21.60 Vented Log Decorative Standard which requires the GA6080 damper clamp accessory.

2. Control Choices Vented Gas Logs are available in three control types: Electronic Ignition, Variable Remote, and Remote Ready. All offer easy, reliable and economical heating.

• Electronic Ignition Models

The Electronic Ignition valve systems include a remote control. These systems allow multiple flame height settings. The pilot lights each time the system is set or calls for heat. This means that the pilot never burns when the main burners are off. When compared to other valve systems, the cost of fuel to continually operate the pilot is avoided. Versus a continuous pilot system, this system will save the home owner money by reducing their fuel usage.

• Variable Remote Controlled Models

Variable Remote Control offers three modes of operation: manual, thermostatic, or smart mode. These systems have settings for adjustable flame height.

• Remote Ready Models

Remote Ready Models are economical, yet allow you the option of adding an On/Off Remote Control

3. Options Vented Gas Logs are available with a variety of styles and options. All models include the a limited 4 year warranty. In addition, all models include Flex Lines to simplify installation.

4. Size Choices Vented Gas Logs are available in 18", 24", 30" & 36" sizes.

5. Fireplace Hoods (If required)

A fireplace hood accessory may be required to deflect heat away from your mantel shelf. Fits fireplace openings from 28" to 48" wide. Installs easily with glass doors or to the lintel of the fireplace opening.

IMPORTANT

Installation must be done by qualified service persons. Read Owner's Manual before using.

Check local codes and ordinances for permitted uses.

All products approved for manufactured (mobile) home installation.

We reserve the right to amend product specifications without notice.

Operating heater at very high elevations could cause nuisance outages.

Use with adequate air (ventilation) only. Humidifies while it heats. Provides water vapor in the area heated. Refer to owner's manual for specifics.

Product cannot be converted between fuel types.

The only warranty we offer is our standard warranty.

Please read the warranty for any limitations or disclaimers.

All parts have a limited four year warranty.

Stainless Steel burners carry a limited five year warranty.

All accessories have a one year warranty.
